

## **Wyre Piddle Planning Protocol (adopted March 2024)**

The Parish Council have agreed to abide by the following protocol when considering planning applications brought to their attention:

We will review all planning applications within our Parish and others which are out-with but could affect our Parish.

We will comment on all applications once we the Councillors have taken a vote and agree, by majority, which response is appropriate from the below classifications;

**'Support'** - If we believe the application will be positive overall for the Parishioners and the Village.

**'Object'** - If we believe the application will have a negative effect for the Parishioners and the Village.

**'No Comment'** – If we believe the impact is on balance, neutral. An example of where this decision may be reached is where an application is for an extension to a property with no material impact on the parish.

Neighbours are consulted as part of the planning process, and we encourage them to respond to the planning authority as they see fit.
